Senior Software Engineer - PNC Financial Services • Certified SAFe Scrum Master

Skills & Technologies

Languages: Java, TypeScript, C#, SQL, PowerShell, MongoDB
Frameworks: Angular, ReactJS, Spring Boot, Node.js, .NET Core, .NET Framework, Entity Framework
Tools & Infra: Docker, Jenkins, GitLab CI/CD, Helm, OpenShift, uDeploy, GitHub Copilot, Postman

Professional Experience

PNC Financial Services

July 2022 – Present

Senior Software Engineer / Technical Lead

Technical Lead & Senior Angular Developer – Asset Management Group

- Architect scalable front-end features for the AMG Advisor Portal using Angular, utilizing internal libraries to ensure strict WCAG compliance and standardizing UI/UX consistency.
- Spearhead vulnerability management, auditing core codebases and engineering remediation directives to mitigate application compliance and architectural security risks.
- Lead Agile transformation for a cross-functional squad of 12, accelerating team delivery velocity by 25% (boosting average sprint throughput from 80 to 100 story points) via optimized scrum ceremonies.

Technical Lead & Senior Java Developer – Microservices & M365 Integration

- Directed a critical suite of Java and Spring microservices, successfully automating a manual data loan entry pipeline for 250,000+ annual records and cutting processing time-to-action by 90%.
- Engineered an automated weekly data feed for Operating Agreements, eliminating a 2-month manual analytical bottleneck and providing instant downstream data visibility.
- Modernized legacy Jenkins CI/CD pipelines to support enterprise Helm deployment initiatives, scaling cloud readiness and containerized application delivery.

Security Analyst – Anti-Money Laundering Platform

- Identified, audited, and patched high-priority vulnerabilities across the enterprise AML platform, driving a 25% reduction in critical risks within the first 30 days of onboarding.
- Partnered with executive business stakeholders to define project scope, build technical prototypes, and strategically resource time-sensitive application initiatives.

M&T Bank

June 2021 – July 2022

Software Engineer I

- Engineered the online Retail Account Opening application using Angular, .NET Core, and SQL Server, delivering an optimized, seamless onboarding experience for individual and joint users.
- Designed complex database layer architecture using Entity Framework and SQL Server to seamlessly absorb legacy data from the People's United Bank merger.
- Built a robust automated regression testing suite via GitLab CI/CD pipelines and Postman, decreasing execution test times by 75%.

Education

Rochester Institute of Technology

May 2021

Bachelor of Science in Web and Mobile Computing (New Media Interactive Development) • Rochester, NY
Summa Cum Laude • Outstanding Undergraduate Scholar • Deans List
